Dear Ehud

The letter and all additional information we have received so far is totally contradictory to what we said, what you heard at your meetings with Mr. Szijjarto and Mr. Orban, and also with what happened at the meeting on the 3rd of September. Till than it was evident, that the Hungarian governement was positive towards the co-operation with Renova on the Kazakh claim.

Based on the information from the staff of the pm we received. it seems, that the pm has got angry with Russia. We still have to clarify, if he has anything against Renova, or it is just generally Russia. The source could not specify what aspect of the Russian policies caused the problem.

On a minor issue related to this, I have spoken to a friend of mine, the CEO of Vegyépszer, who was the main contractor in Tengiz. He says, that they can help us establish our claim. They have a good documentation of all the work done there, and he can help us get in touch with people who worked there. In fact his company still owns office buildings and machinary there, most of it exists on paper, having been stolen. He is trying to press charges and claims to recover these losses (evidently the stuff was taken by the kazakhs), and he would be happy to co-operate.

We are still working on getting more precise information, and will inform you on all developments.

Yours, Peter
